

VIJAY VARDHAN REDDY YAMMANURU

B.Tech Big Data | Python | SQL | Power BI | AI/ML

Hyderabad, India | +91 8985863450 | vijayvardhanreddyyammanuru@gmail.com

PROFESSIONAL SUMMARY

B.Tech Big Data student at NIIT, with hands-on experience in Python, SQL, Power BI, data cleaning, reporting and visualization, data quality validation, data governance support, and AI/ML model support. Built analytics projects across a 200,000+ row IPL dataset, real-time F1 telemetry, and multimodal AI inference, with strong emphasis on data quality, reliable reporting, and stakeholder-ready insights. Recognized campus operations lead with experience coordinating 100+ volunteers and translating technical work into clear outcomes.

CORE SKILLS

Data Analytics: Data cleaning, data transformation, exploratory analysis, KPI reporting, dashboarding, data governance support, data validation, documentation

Programming & BI: Python, SQL, Power BI, Excel, Tableau familiarity

Databases & Engineering: MySQL, MongoDB, Redis, Git, Github

AI/ML: AI-driven insights, machine learning model testing, inference pipelines, model performance tracking, MCTS, Transformer-based fusion, TRIBE v2

Collaboration: Stakeholder communication, cross-functional coordination, team leadership, process documentation

ANALYTICS & AI PROJECTS

IPL Analytics Dashboard | SQL, MySQL, Power BI

- Collected, cleaned, modeled, and analyzed a 200,000+ row IPL dataset covering matches, players, venues, toss decisions, and season outcomes from 2008-2023.
- Built MySQL-based reporting logic and pre-calculated winner, runner-up, Orange Cap, and Purple Cap metrics to improve Power BI performance.
- Designed an interactive Power BI dashboard with season slicers, KPI cards, points table, toss analysis, and venue analysis to communicate insights clearly to non-technical users.

F1 Real-Time Prescriptive Analytics Engine | Python, MCTS, Redis, FastF1, React

- Engineered a Python analytics pipeline that ingests FastF1 telemetry, cleans missing/null race data, and streams raw and enriched strategy outputs through Redis Pub/Sub.
- Simulated 8,000+ alternate race futures per lap using Monte Carlo Tree Search and generated pit-stop recommendations in under 0.15 seconds per driver.
- Back-tested on 2026 Australian, Chinese, and Japanese GP telemetry, achieving 89.1% strategy alignment while documenting assumptions, edge cases, and model behavior.
- Implemented validation and fault-tolerance for dirty telemetry and DNS scenarios, preserving grid consistency and uninterrupted dashboard updates.

NeuroLens Cognitive Load Analyzer | React, FastAPI, Three.js, Meta AI TRIBE v2

- Built a full-stack AI application that predicts student cognitive load by fusing video, audio, and transcript signals into brain-activation outputs across 20,484 cortical vertices.
- Developed an async FastAPI inference backend on Kaggle P100 GPU with progress streaming, model-output documentation, and a Three.js fMRI heatmap viewer.
- Converted model outputs into educator-ready insights using alert rules for severe overload and peak engagement, including timestamped explanations for action.

LEADERSHIP & COLLABORATION

Operations Team Core & Lead | siNUsoid v9, NIIT University Annual Tech Fest

2024-2026

- 6 team leaders and 100+ volunteers were directed across a 3-day event with 5,000+ attendees, managing backstage operations, vendor coordination, inventory, crowd flow, and event issue resolution.
- Led LAN/Wi-Fi infrastructure deployment and live technical support for the gaming arena; received Certificate of Appreciation and Letter of Recommendation from the Dean of Student Affairs.

Head of Elections | NIIT University Student Council Elections

2025-Present

- Managed nominations, campaign regulation, ballot operations, vote counting, result declaration, and campus-wide conflict resolution.

EDUCATION

NIIT University, Rajasthan | Bachelor of Technology in Big Data | 2023-2027

Narayana JR. College, Andra Pradesh 88% | 2023

Narayana Olampiod School, Andra Pradesh 99.5% | 2021

CERTIFICATIONS

- Data Analytics Job Simulation: Data Analysis & Forensic Technology - Deloitte via Forage
- Data Visualisation: Empowering Business with Effective Insights - TATA via Forage
- Google AI Essentials - Google Career Certificates, Credly Verified
- SQL Essential Training, 7.8 CPE Credits NASBA Accredited - LinkedIn Learning
